Since the establishment of the organization 43 years have been completed. We don't know where the time ended between public participation and love of all of you. We reach to the underprivileged people, sometimes as a movement, sometimes as a awareness, sometimes as a responsibility. Thousands of children, youth, farmers and women have been reached through small-scale, long-term and short-term projects. Let's start the New Year with the hope that our shared efforts will provide the driving force to do innovative work.

Training and Education
